◆◆◆ BACKGROUND

The International Conference on Climate Finance and Industry initiated to commemorate the launch of the GCF Secretariat in Songdo, Incheon, celebrates its 10th anniversary this year.

Amid various issues about the climate crisis, such as the implementation status of a New Climate Regime, green recovery from COVID-19, aggravating climate disasters, and global geopolitical instability, the International Conference has selected key topics and discussed them with stakeholders every year.

This conference is developing into a leading international event in Korea, with experts from Korea and abroad coming together to devise solutions and draw lessons to achieve carbon neutrality and effective response to the climate crisis.

We wish to bring together various stakeholders of central and local governments, civic groups, businesses, and international organizations to discuss where we are now and how we can move forward in celebrating the 10th anniversary under the theme of ‘Cooperation(Collaborative Governance).’

We look forward to your continued interest and participation in the 10th International Conference on Climate Finance and Industry and an associated event, the 2023 Green Energy Environment Industry, to be held between 7 and 9 November 2023 at the same venue.

Jeong-bok Yoo Mayor, Incheon Metropolitan City
Ho Goon Park President, Incheon Institute
